San Pablo Oxtotepec. Here we stopped to have lunch and then continued to San Salvador, then down to San Andrés Agueyuc, then to San Lorenzo, then to Xochimilco. By 5:30 P.M., we were generally at the place in Xochimilco when the canoes left. If there were no canoes we walked all night. We generally arrived in Mexico City the following morning and took our fruit to the market.

Some inter-village trade still occurs at the time of fiestas and village *ferias*. However, Tepoztecan trading contacts seem to have become limited for the most part to Cuernavaca. Yautepec, at one time the key market for much of Tepoztecan produce, has now faded in comparison with the role of Cuernavaca.

The circulation of goods and money in Tepoztlán is generally small, but it varies considerably with the seasonal cycles. It is lowest during the months of May, June, July, and August, which is a period of scarcity. The most rapid circulation of goods and the greatest volume of money transactions occur after the plum harvest in September and October, and again after the corn and bean harvest in December and January. Money from plums is generally used to buy new clothing for the family.

Perhaps the most important single occasion for spending during the year is at the Carnaval, which comes in February after the harvest. I have estimated that approximately 50,000 pesos are spent by the villagers for the Carnaval. It is an occasion for buying new clothes, but the largest expense is for the elaborate costumes of the Chinelo dancers. A costume in 1947 cost as much as 800 pesos, and there were 45 dancers from the three competing barrios. Of course most of the costumes are used from year to year, but there is always the expense of repairing and improving them. Some people rent the costumes. The food expense is also great; musicians from each of the competing barrios are fed by the leading families in the barrio. In addition, most families entertain on this day.

The tourist trade has brought some income to Tepoztlán, especially to storekeepers, vendors of soft drinks, and the owners of the two tourist houses, but most of the money spent by these Tepoztecans goes to Cuernavaca.

The other important occasions for spending in Tepoztlán are the barrio fiestas, the gifts for *compadres* at baptisms, the expenses of the groom in weddings, and the expenses for the wakes and funerals.

There are a few corn merchants in the village who speculate in corn by buying in small quantities throughout the year to sell at higher prices during June to September. Speculation in corn is apparently an old practice in the village, for as early as 1579 we find complaints of Tepoztecans against price fixing by local politicians. Some of the corn merchants will make loans on the future corn crop and will be paid back in corn at the time of harvest.

CREDIT, LOANS, AND INTEREST

There are no organized credit facilities in Tepoztlán. Although a few hundred Tepoztecans have had *ejido* parcels since 1930, no *ejido* credit has come to the village. It is said that an effort had been made at one time to obtain such credit but

and although this is the traditional and common practice, it is now considered a real hardship by more and more families. The quantity of water consumed by a family is usually determined by the amount of labor it can devote to water-carrying, and many families limit their use of water for bathing, for plants and animals, and for laundry. Use of the public laundry, generally considered undesirable, is made of necessity by many. The few families with water piped into their patios invariably have flourishing flower, fruit, and vegetable gardens. These families are very much envied, and not infrequently their water pipes are deliberately stuffed or damaged by less fortunate neighbors.

The benefits of toilets are not as generally recognized, and only one private home and the two tourist houses have toilets that can be flushed. The new schoolhouse, however, has toilets and showers, and the younger generation is becoming accustomed to their use. The schoolteachers, the students who have been away to boarding schools, and the not insignificant number of Tepoztecans who have spent time in Mexico City are also familiar with the use of toilets and will undoubtedly be among the first to install them in their dwellings in the future. Some already have constructed screens around their latrines in their yards or orchards to afford some privacy.

Bathing facilities for women and children generally consist of a clay or tin basin at home; the men and older boys bathe in the river. Many women bathe and wash their hair when they do their laundry in a stream or at the public washing place.

No Tepoztecan house has any means of heating other than the kitchen fire. This, however, gives little heat and is extinguished as soon as cooking is completed, to save fuel. In the winter months the family generally retires earlier to keep warm, but since most families have a minimum number of blankets, there is probably some suffering during the night due to cold. Except for early morning, the days are warm all the year round.

There are various means of lighting the house after dark, the most common and inexpensive being candles. Some homes have kerosene lamps and a few of the houses and stores in the center have Coleman gasoline lamps. One Tepoztecan house—that of the prosperous curer, Don Chucho—has electricity which is operated by a privately owned generator. There is talk of installing electricity in the plaza and in the church and chapels near the center, and it is probably only a matter of time before this is done.

Differences in house furnishings are even more striking than differences in house types, and there is an unending variety of combinations of new and old or modern and primitive household items. It is not at all unusual to find under one roof a battery-operated radio, a pre-Hispanic hearth as the only means of cooking, a hand mill for grinding coffee, and the Indian stone *metate* for grinding corn. Modern equipment for cooking, serving, sleeping, lighting, and so forth, is with few exceptions greatly esteemed; and in the majority of families only lack of money prevents its purchase. Among the youth, the more educated, and the large middle economic group, there is a strong desire to live better and to invest

including those in Tepoztlán, continue to work their tiny subsistence holdings with traditional backward methods. And the contrast between the old and the new agriculture in Mexico is becoming sharper: less than 1 percent of the cultivated land is worked with the aid of the country's 55,000 tractors; about 20 percent of the land is still worked by the pre-Hispanic method of cutting and burning without benefit of plow and oxen. The production of Mexico's two basic food crops, corn and beans, has managed to keep up with the rapid population growth in the past twenty years but the margin of security has been slight. In drought years Mexico has been forced to spend its precious dollars to import huge quantities of corn to feed its people.

That the Mexican economy cannot give jobs to all of its people is indicated in the fact that from 1942 to 1955 about a million and a half Mexicans came to the United States as *braceros* or temporary agricultural laborers, and this figure does not include the "wet backs" and other illegal immigration. Mexico has also become increasingly dependent on the United States tourist trade for stabilizing its economy. In 1957, over 700,000 tourists from the United States spent almost 600 million dollars in Mexico, making tourism the single largest industry in the country. The income from the tourist trade is about equal to the total Mexican federal budget.

One aspect of the standard of living which has improved very little since 1940 is housing. With a rapidly rising population and with urbanization, crowding and slum conditions in the larger cities and towns are actually getting worse. Of the 5.2 million dwellings reported in the Mexican census of 1950, 60 percent had only one room and 25 percent two rooms; 70 percent of all houses were made of adobe, wood, poles and rods, or rubble, and only 18 percent of brick and masonry. Only 17 percent had private, piped water.

The Village

How has Tepoztlán changed in the light of these national trends? In 1956 the village did not look much different from the way it looked in 1943. The plaza and market still seemed rather desolate and unprosperous; no additional buildings had been built in the center. There were no new streets or paved roads except for two long cement treads which led up a steep street to the *Posada del Tepozteco,* the new tourist resort run by an American family. More automobile and bus traffic entered the village, and trucks came in with such new items as purified water and tanks of cooking gas for the homes of the foreign colony.

Village men still carried water to their homes from the nearest fountain; women still queued up to have their corn ground at the mills. The older people looked much the same, but the clothes of the younger people were more varied, colorful, and citified. More young women had short hair and permanent waves, and one young girl wore blue jeans. The young men wore modern trousers, shirts, and jackets, and more children had shoes, sweaters, and store-bought clothes. The small shops sold more canned goods and pack-

leading Mexican banker who wanted to build a home in the village negotiated for over a year before he succeeded in buying a modest-sized idle plot of land whose owner was living in Mexico City. By 1956, Tepoztecans had sold almost forty plots to as many outsiders for building homes in the village and in the lovely valley below. Tepoztecan middlemen are now speculating in land because of the steadily rising prices. A village site valued at about 50 centavos per square meter in 1943 sold in 1957 for as much as 12 pesos a meter (100 centavos to the peso).

Tepoztlán has become an international tourist colony. The non-Tepoztecan home owners now include native Mexicans, naturalized Mexican citizens of Spanish, French, German, Dutch, Japanese, and Italian ancestry, and a few Americans. Few of these people live in the village the year around but spend their holidays and vacations there. The construction of thirty-five new homes for the foreign colony has given employment to some Tepoztecan masons and day laborers. Some of the building materials—stone, sand, and tiles—also have been purchased locally. A number of the families have taken Tepoztecan girls as domestic servants both in the village and in their Mexico City or United States homes, and about a dozen Tepoztecans have jobs as caretakers. The colony also provides some additional income to local meat and milk dealers and other merchants. On the whole, the "foreigners" form few friendships in the village and except for the *Carnaval* participate very little in village affairs. It is said that most of the outsiders opposed the campaign to bring electricity to Tepoztlán for fear that it might spoil the primitive rustic quality of the village. It should be noted that among the non-Tepoztecans who have lived in the village are some of Mexico's leading intellectuals and artists and a few doctors. Some of these men have taken a great interest in the villagers and have helped them in their efforts to build a new high school, to obtain city water, and most recently (June 1958) to procure electricity.

Other forms of tourism have also grown rapidly and tourist facilities have improved. Most important has been the conversion of the banker's private home into one of the most charming resorts in Mexico, the *Posada del Tepozteco*. Since the late forties, Mexican and Hollywood movie producers have used Tepoztlán as the setting for a number of movies.

Since 1943, educational facilities have been expanded in the village. Two new schools built in the larger barrios gave the village a total of four elementary schools. Attendance rose from about 750 in 1950 to over 900 in 1956. In 1950, a high school was completed, and attendance rose from 54 in the first year to 110 in 1956. Boys still predominate over girls in both elementary and high schools. The surrounding villages have begun to reach out for higher education and now send their children to the central high school in Tepoztlán. Each year a number of Tepoztecan high-school graduates go on to the university in Mexico City.

In the past ten years bus travel to Cuernavaca has almost doubled and travel to Mexico City also has increased. On an average week day approximately 500 Tepoztecans take the bus to Cuernavaca to work, shop, study, sell produce, and to find recreation. Some of the peasants now think it worthwhile to take the bus to their *milpas*, a distance of two or three kilometers, rather
